

Guidelines for Evaluation of PG Dissertation Research Track Applicable to All M. Tech. Programmes

1. Introduction

The PG Dissertation Project is an important component of postgraduate education aimed at developing advanced technical knowledge, analytical capability, research aptitude, professional competence and independent problem-solving skills among students. The dissertation/project work provides an opportunity for students to apply their domain knowledge towards a well-defined technical problem through systematic planning, execution, analysis and documentation.

The evaluation process shall assess the overall development and performance of the student during the dissertation/project period.

The PG Dissertation Project shall be evaluated through two phases.

2. Project Tracks

The PG Dissertation Project shall be carried out under one of the following tracks:

Track I – Research Dissertation Track: The Research Dissertation Track is applicable to students undertaking research-oriented work involving systematic investigation of a technical problem.

Track II – Industry Integrated Project Track: The Industry Integrated Project Track is applicable to students undertaking industry-oriented, industry-sponsored or application-based projects.

3. Evaluation of the P. G. Dissertation

The following rating scale shall be used by evaluators during assessment.

Rating	Description	Scale
Excellent	Work demonstrates comprehensive understanding, strong technical depth, independent thinking and achievement beyond expected standards	>90%
Very Good	Work demonstrates clear understanding, appropriate technical approach and satisfactory achievement of objectives	80-89%
Good	Work meets expected requirements with acceptable technical quality and minor limitations	70-79%

Satisfactory	Work partially meets requirements but requires improvement in technical depth, analysis or execution	60-69%
Needs Improvement	Work does not demonstrate adequate understanding, planning or achievement of expected outcomes	<60%

4. Evaluation Scheme

Phase I – Project Planning and Proposal Development

Evaluation Component	Nature	Maximum Marks
Presentation I – Research Problem Identification and Planning Review	Internal	150
Presentation II – Research Proposal Finalization and Preliminary Work Review	Internal	200
Phase-I External Presentation and Oral Examination	External	150
Phase-I Total		500

Phase II – Project Execution and Completion

Evaluation Component	Nature	Maximum Marks
Presentation III – Research Execution, Analysis and Progress Review	Internal	150
Presentation IV – Final Internal Evaluation	Internal	200
Phase II Final External Presentation and Oral Examination	External	150
Phase-II Total		500

5. General Evaluation Guidelines

- [1] Every M.Tech student shall carry out the dissertation under the supervision of an approved Dissertation Supervisor.
- [2] The Departmental Postgraduate Committee (DPGC), also referred to in different academic documents as the Departmental Programme Committee (DPC) or Postgraduate Dissertation Committee (PGDC), shall be the internal committee responsible for reviewing the progress and quality of the dissertation work.
- [3] This committee shall comprise:
 - Head of the Department (HoD) – Chairman
 - PG Coordinator – Convener
 - Other teaching faculty members of the Department – Members

- [4] During each review, the committee shall examine the progress of the work, methodology adopted, technical content, achievement of objectives, analysis of results, quality of presentation, and action taken on suggestions given during the previous review.
- [5] The student shall address the observations and corrections suggested by the committee before appearing for the next presentation.
- [6] A student shall be permitted to proceed to Phase II only after satisfactory completion of the required evaluations under Phase I.
- [7] Presentation IV (Final Internal Evaluation) shall be treated as the final internal review. The committee shall examine whether the dissertation has reached the required level of completion and whether the student is ready to appear for the Final External Examination.
- [8] Only those students who satisfactorily complete the prescribed internal evaluations of Phase II shall be eligible for the Final External Presentation and Oral Examination.
- [9] The ESE/OE/PoE shall be conducted separately by a Panel of Examiners consisting of:
 - Chairman – HoD / Nominated member from the committee by HoD
 - Internal Examiner – Dissertation Supervisor
 - External Examiner – Subject expert from outside the Institute
- [10] Where applicable, the contribution and feedback of an Industry Mentor/Supervisor will be taken into consideration while reviewing the student's dissertation progress and performance.

**DISSERTATION PHASE I****Presentation I – Track I: Research Dissertation Track Research Planning Review
(Maximum Marks: 150)**

Student Name : _____

PRN / Roll No. : _____

Program : _____

Department : _____

Supervisor Name : _____

Dissertation Title : _____

Semester : _____

Academic Year : _____

Sr. No.	Evaluation Criterion	Expected / Relevant Contents	Max. Marks	Marks Obtained
1	Research Problem, Aim and Objectives	Clarity, relevance, technical significance, feasibility and appropriateness of research objectives	30	
2	Literature Review and Research Gap	Adequacy of literature, critical review, current state of knowledge and identification of research gap	30	
3	Proposed Research Methodology	Appropriateness of methodology, experimental/numerical/analytical procedures, tools and techniques	45	
4	Research Planning and Feasibility	Work plan, resources, facilities, milestones, feasibility and proposed schedule	15	
5	Presentation and Response to Questions	Organization, clarity, technical understanding, communication and response to questions	30	
	TOTAL		150	

Review Comments / Corrections Required
