

Guidelines for Evaluation of PG Dissertation Research Track Applicable to M. Pharm. Programmes

1. Introduction

The PG Dissertation Project is an important component of postgraduate education aimed at developing advanced technical knowledge, analytical capability, research aptitude, professional competence and independent problem-solving skills among students. The dissertation/project work provides an opportunity for students to apply their domain knowledge towards a well-defined technical problem through systematic planning, execution, analysis and documentation.

The evaluation process shall assess the overall development and performance of the student during the dissertation/project period.

The PG Dissertation Project shall be evaluated through two phases.

2. Project Tracks

The PG Dissertation Project shall be carried out under one of the following tracks:

Track I – Research Dissertation Track: The Research Dissertation Track is applicable to students undertaking research-oriented work involving systematic investigation of a technical problem.

Track II – Industry Integrated Project Track: The Industry Integrated Project Track is applicable to students undertaking industry-oriented, industry-sponsored or application-based projects.

3. Evaluation of the P. G. Dissertation

The following rating scale shall be used by evaluators during assessment.

Rating	Description	Scale
Outstanding	Work demonstrates comprehensive understanding, strong technical depth, independent thinking and achievement beyond expected standards	>90%
Excellent	Work demonstrates clear understanding, appropriate technical approach and satisfactory achievement of objectives	80-89%
Good	Work meets expected requirements with acceptable technical quality and minor limitations	70-79%
Fair	Work partially meets requirements but requires improvement in technical depth, analysis or execution	60-69%
Average	Work does not demonstrate adequate understanding, planning or achievement of expected outcomes	<60%

4. Evaluation Scheme

Phase I – Project Planning and Proposal Development

Evaluation Component	Nature	Maximum Marks
Presentation I (Journal Club I) – Research Proposal Review	Internal	25
Presentation II – (Discussion Presentation) Materials & Methodology Work Review	Internal	50
Phase-I (Research Work) External Presentation and Oral Examination	External	350
Phase-I Total		425

Phase II – Project Execution and Completion

Evaluation Component	Nature	Maximum Marks
Presentation III – (Journal Club II) Experimental Progress Review - I	Internal	25
Presentation IV – (Discussion Presentation) Experimental Progress Review - II Final Internal Evaluation	Internal	75
Phase II (Research Work & Colloquium) Final External Presentation and Oral Examination	External	400
Phase-II Total		500

DISSERTATION PHASE I
Presentation I - Track I: Research Dissertation Track
(Journal Club I) – Research Proposal Review – (Maximum Marks: 25)

Student Name	:	
PRN / Roll No.	:	
Program	:	
Department	:	
Supervisor Name	:	
Dissertation Title	:	
Semester	:	
Academic Year	:	

Sr. No.	Evaluation Criterion	Expected / Relevant Contents	Max. Marks	Marks Obtained
1	Research Problem, Aim and Objectives	Clarity, relevance, technical significance, feasibility and appropriateness of research objectives	05	
2	Literature Review and Research Gap	Adequacy of literature, critical review, current state of knowledge and identification of research gap	05	
3	Proposed Research Methodology	Appropriateness of methodology, experimental/numerical/analytical procedures, tools and techniques	07	
4	Research Planning and Feasibility	Work plan, resources, facilities, milestones, feasibility and proposed schedule	03	
5	Presentation and Response to Questions	Organization, clarity, technical understanding, communication and response to questions	05	
	TOTAL		25	

Review Comments / Corrections Required

Presentation II – Track I: Research Dissertation Track
[(Discussion Presentation) Materials & Methodology Work Review] (Maximum Marks: 50)

Student Name	:	
PRN / Roll No.	:	
Program	:	
Department	:	
Supervisor Name	:	
Dissertation Title	:	
Semester	:	
Academic Year	:	

Sr. No.	Evaluation Criterion	Expected / Relevant Contents	Max. Marks	Marks Obtained
1	Incorporation of Presentation-1 Corrections	Satisfactory incorporation of observations, corrections and recommendations	5	
2	Final Literature Review and Research Gap	Updated literature, critical synthesis and clear finalization of research gap	10	
3	Research Objectives and Expected Contribution	Specific and measurable objectives, research questions/hypotheses and expected contribution	10	
4	Finalized Research Methodology	Detailed methodology, variables, tools, experiments/models, data requirements and validation approach	15	
5	Research Work Plan and Feasibility	Resources, facilities, milestones, schedule and feasibility	5	
6	Presentation and Technical Defense	Presentation quality, technical understanding and justification of proposed research	5	
	TOTAL		50

DISSERTATION PHASE II
Presentation III - Track I: Research Dissertation Track
[(Journal Club II) Experimental Progress Review - I] (Maximum Marks: 25)

Student Name	:	
PRN / Roll No.	:	
Program	:	
Department	:	
Supervisor Name	:	
Dissertation Title	:	
Semester	:	
Academic Year	:	

Sr. No.	Evaluation Criterion	Expected / Relevant Contents	Max. Marks	Marks Obtained
1	Incorporation of Corrections given in Phase-I	Satisfactory incorporation of corrections/recommendations from Phase I	2	
2	Implementation of Research Methodology	Systematic execution of experimental, numerical, analytical, computational or field methodology	4	
3	Data Collection / Experimental / Numerical Work	Quality, adequacy, accuracy and progress of data generation, experiments, modelling, simulations or field work	5	
4	Data Analysis and Preliminary Interpretation	Appropriate analysis, calculations, graphs/tables, trends and interpretation of preliminary results	4	
5	Validation and Technical Verification	Validation against experiments, literature, standards, theory or benchmark results, as applicable	4	
6	Technical Progress and Problem-Solving Ability	Progress against plan, handling of difficulties, corrective measures and independent problem solving	2	
7	Dissertation / Research Documentation Progress	Chapter preparation, references, research records and systematic documentation	2	
8	Presentation and Response to Questions	Clarity, technical understanding, communication and response to questions	3	
	TOTAL		25

Phase-II - Track I: Research Dissertation Track
(Research Work & Colloquium) Final External Presentation and Oral Examination:
(Maximum Marks: 400)

Student Name	:	
PRN / Roll No.	:	
Program	:	
Department	:	
Supervisor Name	:	
Dissertation Title	:	
Semester	:	
Academic Year	:	

Sr. No.	Evaluation Criterion	Expected / Relevant Contents	Marks	Marks Obtained
1	Quality and Originality of Research Work	Novelty of topic, relevance to Pharmacy, originality of approach, research contribution, technical depth and overall quality of work	40	
2	Research Methodology	Appropriateness of methodology, experimental/numerical procedure, selection of tools or software, assumptions, variables, testing methods and systematic execution of research	50	
3	Data Analysis and Interpretation	Accuracy of calculations, use of appropriate analytical/statistical methods, interpretation of results, graphs/tables, validation and technical reasoning	50	
4	Results, Discussion and Conclusions	Clarity of findings, comparison with literature or standards, significance of results, conclusions supported by data, limitations and future scope	50	
5	Dissertation Quality	Organization of chapters, technical writing, clarity, coherence, figures, tables, equations, referencing, formatting and overall academic presentation	50	
6	Manuscript / Conference Paper / Research Paper Submission	Quality of manuscript, relevance of selected journal, evidence of submission, technical content, response to reviewer comments and revision, if applicable	80	
7	Presentation of Research Work	Structure of presentation, clarity of explanation, quality of slides, effective presentation of methodology, results and conclusions, time management	25	
8	Oral Examination and Technical Defense	Understanding of research work, subject knowledge, ability to justify methodology and assumptions, response to technical questions, confidence and logical explanation	40	
	Total		400
